**THE REPORT**  
**OF THE**  
**PRESIDENT OF QUEEN'S COLLEGE, GALWAY,**  
**FOR**  
**THE SESSION 1897-98.**

---

**TO THE QUEEN'S MOST EXCELLENT MAJESTY.**

**MAY IT PLEASE YOUR MAJESTY.**

In accordance with the provisions of the Act of Parliament founding the Queen's Colleges, I have the honour of submitting to Your Majesty the following Report of the proceedings and condition of the Queen's College, Galway, for the Session 1897-98.

In accordance with the custom of previous years, the numbers and religious persuasions of the Students who have entered the College, and attended the Lectures, since the opening of the College in 1849, will be found in the annexed tables (marked III. and IV.).

The number of Students attending the College during the Session was 91, of whom 26 matriculated in October, 1897.

It has been remarked in many previous Annual Reports that the paucity of Students on the roll of the College was due to the fact that this province was "comparatively bare of facilities for higher Education," and the class from which our Students would most naturally be drawn was compelled by the struggle for bare subsistence to sacrifice their ambition for educational advancement. It may be hoped that the opening of the new line of railway to Clifden will before long succeed in opening up a district unrivalled in Ireland for its natural advantages, and that the resulting development of the resources of this province may react favourably upon the position of the College.

The distinctions gained by past and present Students of the College during the Session 1897-8 compare favourably with the successes of any previous year. Mr. W. Kennedy, M.A., a former Scholar of the College, has been awarded a Fellowship Prize of the first Class (£60) in Trinity College, Dublin, having failed by but ten marks to gain the valuable Madden Prize (£310) awarded to the candidate second in the Fellowship Examination.

In the Royal University of Ireland, the following distinctions were gained during 1897:—

*Faculty of Arts*.—Exhibitions—1 First Class.  
3 Second Class.  
Honours—7 First Class.  
11 Second Class.

Mr. Hugh Ryan was awarded a special Gold Medal at the M.A. Degree Examination, and at the Junior Fellowship Examination a Prize of £50 for distinguished answering:—

*Faculty of Law*.—Exhibitions—1 Second Class.  
Honours—1 Second Class.  
*Faculty of Medicine*.—Honours—1 First Class.  
*School of Engineering*.—Exhibitions—2 First Class,  
1 Second Class.  
Honours—3 First Class.  
4 Second Class.

The distinctions gained by the School of Engineering formed a very large proportion of all the Honours awarded in this subject, and well maintained the reputation of the Galway School of Engineering.

In this connexion, I am glad to record the fact, that a former distinguished Student of the College, Mr. C. W. Olling, Chief Engineer and Secretary to the Government, North-western Provinces of India, in the Public Works Department, has been appointed Companion of the Star of India.

By this success, Mr. Olling has taken rank with the many other famous Queen's College men who have won their spurs in the Service of the Crown in India.

A Research Scholarship in Science, offered by the Royal Commission for the "1851 Exhibition," has been conferred upon Mr. Hugh Ryan, whose distinguished career has been recorded above.

As there seems to be current some doubt as to the advisability of continuing these scholarships, I may be allowed to place on record my conviction that, in this age when all sparks of originality are only too likely to be prematurely extinguished in the somewhat sordid struggle for prizes in examinations, the taste for original research is a delicate plant needing careful nurture. In this College, at any rate, the Research Scholarship has been productive of most excellent results. Mr. William Cannon, Scholar in 1892-4, has done most important work in electricity, and has been appointed Lecturer and Demonstrator in Physics at the Owens College, and, subsequently, Head Master of the Municipal School of Science, Stafford, and Science Master and Inspector to the Staffordshire County Council. Mr. John McClelland, Scholar 1894-5, is a distinguished Physicist, and has lately won a Junior Fellowship in the Royal University of

Ireland, and, furthermore, the rare distinction of a Research Degree in Cambridge. He is now Demonstrator in the Cavendish Laboratory. The Scholar for the present year, Mr. Hugh Ryan, is pursuing original research in Organic Chemistry in the University of Berlin.

A great addition has lately been made to the usefulness of this College, by the institution of a Special Lectureship in Pathology. The Lecturer appointed in this most important subject is Dr. W. J. Dargan, a distinguished Graduate of the Royal University of Ireland.

Testified by Your Majesty's dutiful servant,

WILLIAM J. M. STARKIE, *President.*

18th July, 1898.
